

3-in-1 Soil Moisture, pH, and Sunlight Tester

The 3-in-1 soil tester is designed to accurately measure soil moisture content, pH level, and sunlight intensity. Ideal for gardeners, landscapers, and agricultural professionals, it helps optimize growing conditions for plants by providing essential data on soil health and environmental factors.

Product Overview

Professional Soil Analysis Tool

The 3-in-1 soil tester is a versatile instrument designed to accurately measure soil moisture content, pH levels, and sunlight intensity. This compact, user-friendly device features dual probes for precise readings and a simple switch to select between measurement modes. It is an essential tool for gardeners, landscapers, and agricultural professionals looking to optimize growing conditions and maintain plant health.

Technical Specifications

Design Features

- Dual-probe sensor system
- Mode selection switch
- Compact and portable

Measurement Functions	Soil Moisture, pH Level, Sunlight Intensity
Power Source	No batteries required

Usage

Ideal For

Gardeners • Landscapers • Agricultural Professionals
