Product Overview

High-Efficiency Water Pumping Solution

This 3-inch clean water pump is engineered for high-performance water transfer, featuring a robust 208cc engine that delivers reliable power and increased efficiency. Designed for durability and ease of maintenance, the unit is ideal for irrigation, construction sites, and general water removal applications. Its portable, compact structure ensures high flow capacity with minimal vibration, making it a dependable choice for demanding professional environments.

Performance Highlights

5 %

Power Increase

200 hours

Durability Test

Engine Displacement	208 cc
Inlet/Outlet Diameter	3 inch

Features

Product Features

- Self-priming centrifugal design
- High-efficiency flow capacity
- Durable reinforced frame
- Low-vibration operation
- Simple maintenance structure
- Optimized low oil temperature design

Applications

Recommended Use Cases

Agricultural Irrigation, Construction Dewatering, General Water Transfer, Emergency Water Removal
