Overview

Professional Grade Water Transfer

This 3-inch gasoline-powered water pump is engineered for reliable performance in agricultural, construction, and emergency drainage applications. Featuring a self-priming centrifugal design, it offers a robust solution for efficient water transfer and irrigation needs. Its portable construction and durable aluminum and cast iron build ensure long-lasting utility in demanding environments.

Engine Performance

Engine Model	FC152F
Displacement	98 cc
Fuel Tank Capacity	1.4 L
Oil Capacity	0.45 L
Continuous Working Time	1.5 Hour

Technical Specifications

Pump Type	Self Priming Centrifugal Pump
Body & Impeller Material	Aluminum, Casting Iron

Performance Metrics

Key Performance Indicators

34 m³/h
Max Flow

12 m
Max Lift Head

7 m
Suction Head

Physical Dimensions

Weight

Type	Weight
Gross Weight	12
Net Weight	11

Inlet/Outlet Diameter	76/68 mm
-----------------------	----------

Package Dimensions	420x335x390 mm
--------------------	----------------

Logistics

Loading Quantity (20GP/40HP)	540/1300
