Overview

High-Capacity Low Gravity Caster

This 3-inch nylon height-adjustable rigid caster is engineered for stability and high load-bearing performance in low-profile applications. Featuring a robust double ball bearing swivel raceway and a lever-operated height adjustment mechanism, it ensures precise leveling and smooth mobility. The durable polyamide (PA) wheel and reinforced steel construction make it an ideal solution for heavy-duty industrial and commercial equipment.

Technical Specifications

| | |
|------------------------|--|
| Wheel Size | 75 x 32 mm |
| Wheel Material | Nylon (Polyamide) |
| Bearing Type | Double ball bearing |
| Surface Finish Options | Zinc Plated, Black Electrophoresis, Bright Zinc, Chrome Plated |

Construction Features

Structural Features

- Heavily embossed, formed steel upper and lower cup
- Double row bearing swivel raceway construction
- Sealed raceway for bearing protection
- Integrated lever for height adjustment and locking
- Rigid low-gravity design for enhanced stability

Applications

Recommended Use Cases

- Vending machines
- Electronic & business machines
- Display stands & racks
- Low-height, high-capacity industrial requirements
