

## 3-Inch Pneumatic Cut-Off Tool

This pneumatic tool is designed for cutting a variety of materials. Its compact design allows for easy handling in tight spaces.

### ADDITIONAL IMAGES

### Overview

#### High-Performance 3-Inch Pneumatic Cut-Off Tool

This pneumatic cut-off tool is designed for precision and durability in demanding B2B environments. Featuring a lightweight die-cast aluminum body and a high-speed 20,000 RPM motor, it allows for efficient one-handed operation. It is an ideal solution for quickly cutting through mufflers, tail pipes, and various metal components while ensuring operator safety with a built-in chrome-plated steel guard.

### Performance

#### Performance Metrics

**20000 RPM**

Free Speed

**90 PSI**

Air Pressure

**6 CFM**

Air Consumption

### Technical Specifications

#### Dimensions & Weight

Feature	Metric	Imperial
Cutting Blade	76.2 mm	3"
Total Length	187 mm	7.36 in
Weight	0.74 kgs	1.63 lbs
Air Inlet Size	1/4"	
Operation Angle	0 °	
Optional Accessories	1/8" (3mm) collet available	

## Design & Safety

### Safety & Construction

- Durable and lightweight die-cast aluminum body
- Safety trigger for easy and secure start-up
- Chrome-plated steel guard for spark protection
- Rear exhaust design to direct air away from work
- Rotating guard for enhanced user protection

## Applications

### Recommended Applications

Mufflers, Tail Pipes, Metal Parts, Automotive, Metalworking, Construction

## Maintenance

### Maintenance Requirement

Daily Oiling Required
