Product Overview

Professional-Grade 3-Inch Water Pump

This high-performance 3-inch water pump is engineered for efficient drainage and irrigation in demanding agricultural and construction environments. Built with a robust engine and durable housing, the unit delivers consistent water transfer rates and reliable long-term performance. Its sturdy frame ensures stability during operation and facilitates easy transport across different job sites.

Technical Specifications

Intake/Outlet Diameter	3 inch
Model Identifier	JL20PG
Primary Applications	Agricultural Irrigation, Drainage, Dewatering, Construction Site Water Transfer

Maintenance and Operation

Startup Protocols

- Check engine oil level before operation
- Ensure oil is filled to appropriate levels
- Follow proper engine starting procedures
