

3-Ply Disposable Nonwoven Face Mask

This 3-ply nonwoven disposable face mask is designed for dust and safety purposes. It features an ultrasonic construction and is suitable for surgical environments.

Product Overview

High-Quality 3-Ply Protection

This 3-ply disposable nonwoven face mask is engineered for general health care activities and personal protection. Featuring an ultrasonic construction, it provides a reliable barrier against airborne particles and contaminants while maintaining breathability. The multi-layer design ensures both safety and comfort for daily use in various environments.
