

3-Pole 40A Definite Purpose Contactor

This 3-pole, 40A contactor is designed for definite purpose applications and operates at 220/240V. It provides reliable switching for motors, compressors, and resistive loads in HVAC and refrigeration systems.

Overview

Reliable Definite Purpose Contactor

This definite purpose magnetic contactor is engineered for demanding HVAC and refrigeration applications. Designed for reliability, it ensures consistent switching performance for motors, compressors, and resistive loads in industrial control systems. With robust construction and easy installation features, this unit provides a dependable solution for equipment maintenance and new system integration.

Electrical Specifications

Contact Ratings Table

Voltage (VAC)	FLA (A)	LRA (A)	Resistive (A)
240	40	240	50
480	40	200	50
600	40	160	50

Rated Current (FLA)	40 A
Coil Voltage	24VAC
Operating Frequency	50/60Hz
Number of Poles	2

Installation & Compliance

Torque Requirements

22 in-lbs

CU IST Screws

40 in-lbs

Lugs

Compatible Applications

- HVAC Systems
- Refrigeration Compressors
- Heating Systems
- Industrial Control

Certifications

CUL, CE, IEC60947-4-1
