

3-Ton Hydraulic Dumper with Deutz Diesel Engine

This 3-ton dumper is powered by a Deutz diesel engine. It features a 5-forward and 5-reverse speed gearbox.

Overview

High-Performance 3-Ton Hydraulic Dumper

This 3-ton hydraulic dumper is engineered for heavy-duty material transport in demanding construction and mining environments. Featuring a 4-wheel drive system and an articular frame with hydraulic steering, it offers exceptional maneuverability and traction on uneven terrain. The machine is equipped with ROPS protection and OTR tires to ensure operator safety and long-term durability in the field.

Key Performance Metrics

Performance Highlights

3000 kg

Payload Capacity

1.5 m³

Bucket Capacity

36 kW

Max Power

Engine Options

Engine Specifications

Engine Model	Cooling Type	Rated Power	Rated Speed
F3L912 (Deutz Tech)	Air Cooling	36 KW	2300 rpm
NB485	Water Cooling	30 KW	2600 rpm

Drive & Transmission

Drive System

- 4 Wheel Drive (4x4)
- Articular frame construction
- 5 Forward speeds
- 5 Reverse speeds
- Hydraulic steering system

Technical Capabilities

Grade Ability	36 %
Maximum Speed	25 - 28 Km/h
Min. Turning Radius	d 4.5m

Physical Dimensions

Overall Size (LxWxH)	3900 x 1800 x 1820/2600 mm
Machine Weight	2250 kg

Safety & Equipment

Standard Features	Hydraulic Tipping, ROPS Protection, OTR Tyres, Skip Loader Design, Tough Rider Configuration
