Overview

High-Performance Mini Excavator

This 3-ton mini excavator is engineered for versatility and efficiency in construction, landscaping, and utility applications. Featuring a tailless compact design, it offers exceptional maneuverability in tight job sites while maintaining robust digging and lifting capabilities. The machine is built with high-quality hydraulic components and a reliable diesel engine, ensuring long-term durability and productivity for professional operators.

Performance & Engine

Emission Standards

EPA Final Tier 4

Key Performance Metrics

3 ton Operating Weight	2.8 m Max Digging Depth	3 m Max Dumping Height	0.1 m³ Bucket Capacity
----------------------------------	-----------------------------------	----------------------------------	---

Engine Type

3-cylinder, 4-cycle, liquid-cooled diesel

Design & Maneuverability

Crawler Functionality

- Retractable for truck transport
- Retractable for narrow job site access
- Extendable for excavation stability

Design Features

Tailless, Compact, Adjustable Crawlers

Operator Comfort & Control

Cabin & Operator Comfort

- ROPS and FOPS certified structure
- Air-suspension seat
- Wide entryway for easy access
- Optional air conditioner

Control System

Multifunction pilot joystick

Maintenance & Attachments

Maintenance Highlights

- 180-degree quick-service side door
- Maintenance-free steel arm
- High-quality flexible hydraulic cylinders
- No aftertreatment devices required for emissions

Compatible Attachments

Bucket, Hydraulic Hammers, Plate Compactors, Augers
