

30 Amp 2-Pole Electrical Contactor

This 30 amp 2-pole contactor is designed for controlling electrical circuits. It is commonly used in refrigeration, air conditioning, and heating systems.

Overview

Professional Grade Electrical Contactor

This 2-pole electrical contactor is engineered to meet rigorous electrical and mechanical standards for HVAC&R applications. Designed for reliability, it features a robust construction suitable for controlling high-current circuits, including hermetic refrigeration compressors. It provides versatile voltage compatibility and secure terminal connections, making it an essential component for professional electrical installations.

Technical Specifications

Terminal Torque Specifications

- Screws: 20 in-lbs
- Lugs: 40 in-lbs

Number of Poles	2
Coil Voltage	208/240VAC
Frequency	50/60Hz
Certifications	cULus, CSA
