

# 30-Channel UHF Wireless Microphone System

This UHF wireless microphone system has 30 channels for selecting a clear frequency. The system's digital diversity technology ensures stable signal transmission and reduces signal dropouts.

## ADDITIONAL IMAGES

## Overview

The wireless system features a handheld microphone and a compact receiver with a digital frequency display and signal indicators.

### Professional UHF Wireless Microphone System

The UH-15 is a high-performance 30-channel UHF wireless microphone system featuring digital diversity technology for enhanced signal stability and a range of up to 60 meters. Designed for versatility, the receiver is powered via a standard 5V USB input, making it ideal for both indoor setups and portable outdoor use with power banks. With auto-synchronizing functions and individual ID code locking, it provides a reliable, interference-free audio solution for professional presentations and live performances.

## Technical Performance

### Performance Highlights

<b>30</b> Selectable Channels	<b>60 m</b> Operating Distance	<b>5 V</b> Power Input
----------------------------------	-----------------------------------	---------------------------

<b>Frequency Range</b>	480~960MHz (Region dependent)
<b>Signal Technology</b>	Digital Antenna Diversity

## Connectivity & Power

### Audio Outputs

- Balanced XLR Output
- Unbalanced 1/4" Line Output

### Power Supply

DC 5.0V / 1.0A via USB

## Features

### System Features

- LCD display showing working frequency
- Auto Synchronizing receiver/transmitter matching
- ID code locking to avoid outside interference
- Compact metal receiver housing
- Simple function key operation

## Compliance

### Certifications

CE • FCC

## Usage

### Recommended Applications

Live Performance, Public Speaking, Presentations, Outdoor Events, Home Audio
