

3000W Portable Power Station

This 3000W portable power station is designed for backup, off-grid, and mobile power needs. It features a high-capacity battery, multiple AC 220V outlets, DC outputs, and USB ports.

Overview

High-Capacity Portable Power Solution

The 3000W Energy Storage System (ESS) is a versatile, high-capacity power solution engineered for diverse environments, including off-grid scenarios, mobile operations, and emergency backup. Featuring a robust battery capacity and a comprehensive array of AC and DC outputs, it provides reliable power for a wide range of devices. Designed for portability, the unit integrates a retractable handle and wheels, ensuring ease of movement despite its substantial power capabilities.
