Product Overview

3000W Uninterruptible Power Source

This 3000W fully automatic DC to AC inverter charger provides a reliable pure sine wave output, ensuring seamless compatibility with sensitive electronic equipment. It integrates a high-efficiency 25Amp battery charger designed to restore and maintain battery health for maximum service life. With integrated AC 220V outlets, USB connectivity, and a real-time voltage display, it serves as an essential solution for robust power backup management.

Technical Specifications

Power Capacity

3000 W

Rated Power Output

Waveform

Pure Sine Wave

Output Ports

- AC 220V Outlets
- USB Port

Charging Current

25 Amps

Key Features

Fully Automatic, Battery Health Maintenance, Voltage Display, DC to AC Conversion
