

300A High Voltage Fuse Blade

This 300A fuse blade is an accessory for outdoor expulsion drop-out type distribution fuse cutouts. It protects power systems from overload and short-circuit failures.

Product Overview

High-Voltage Protection Component

This 300A high-voltage fuse blade is engineered for use in outdoor expulsion drop-out type distribution fuse cutouts. It serves as a critical protection device, safeguarding power systems against overload and short-circuit failures. Designed with robust materials, it offers high mechanical strength and reliable performance in demanding electrical environments.

Technical Specifications

Rated Current

300 A

Rated Current

Key Performance Features

- High over-current protection capability
- High breaking current performance
- High industrial frequency withstand voltage
- High mechanical strength

Voltage Ratings

11kV - 36kV

Standards Compliance

IEC 600282-2

Logistics & Ordering

Shipping Methods

Sea Freight • Air Freight • Express Delivery

Packaging Details

25 pieces per carton, foam-lined, packed on pallets; custom packaging available upon request.

Standard Lead Time

Approximately 15 days (subject to order quantity)
