Overview

High-Performance Off-Road Engineering

Designed specifically for skillful riders, this 300cc off-road motorcycle combines power with precision handling. It features a water-cooled engine with an internal balance shaft to minimize vibration, paired with a lightweight, high-strength forged alloy frame. With fully adjustable suspension and aerodynamic plastics, this bike is engineered to deliver agility and control across challenging terrains.

Engine & Performance

Engine Specifications

300 CC

Displacement

18.5 kW

Max Power

8500 r/min

Rated RPM

Technical Details

Feature	Specification
Engine Type	4-stroke, water cooling
Bore & Stroke	74 x 65 mm
Starting Mode	Electric/Kick start
Transmission	5 gear
Carburetor	PE28

Chassis & Suspension

Suspension System

- Front: 53/58.5-910mm fork, compression & rebound damping adjustable
- Rear: 480mm shock with external air bag, compression & rebound damping adjustable

Frame Construction

Forged Alloy Frame, Reinforced Tube, Forged Alloy Swing Arm, 7XXX Alloy Fat Bar

Wheels & Brakes

Wheel & Tire Configuration

Position	Rim Size	Tire Size
Front	1.60-21	80/100-21
Rear	2.15-18	100/90-18

Braking System

Disc brakes, 240mm diameter (front and rear)

Dimensions & Capacity

Weight & Load

117 kg

Net Weight

90 kg

Max Loading

Dimensions

2140 x 820 x 1240 mm

Fuel Capacity

6.5 L
