Overview

Heavy-Duty Cargo Solution

The TR-28 is a robust 300cc water-cooled gasoline cargo tricycle engineered for demanding heavy-duty hauling. Featuring a reinforced double rear axle configuration and a spacious cargo bed, it offers exceptional stability and a load capacity of up to 3000kg. Designed for reliability, the water-cooled engine ensures consistent performance and thermal management during extended operation.

Performance

Load Capacity

3000 kg
Max Load

Engine Displacement	300 cc
Engine Type	1-cylinder, 4-stroke, Water-cooled
Transmission	5 forward + 1 reverse
Starter System	Electric, Kick

Construction & Chassis

Suspension System

- Front: Giant mountain type absorber
- Rear: 7-piece heavy-duty suspension

Chassis Specification	50*10 heavy-duty
Rear Axle	Full floating, 220mm drum

Cargo & Dimensions

Cargo Box Features

Flowered bottom • 700mm high engineering box

Cargo Box Dimensions

2.8m x 1.45m

Additional Features

Battery

28A

Tire Size

5.00-12

Comfort & Protection

Luxury sunshine-proof design
