Overview

High-Performance Silent Diesel Generator

This 300kW silent diesel generator set is engineered to provide reliable and consistent backup power for industrial, commercial, and residential applications. Housed in a soundproof canopy, it ensures quiet operation while maintaining high efficiency and durability. The unit features a comprehensive, self-starting control panel that monitors critical performance metrics, including voltage, frequency, and engine health, offering seamless integration into your power infrastructure.

Parameter	Value
Rated Voltage	400/230V
Rated Current	540A
Rated Frequency	50Hz
Power Factor	0.8 (lag)
Phase Connection	Three-phase four-wire

Engine Details

Engine Specifications

- Type: Four-stroke, waste gas turbine boost, direct injection
- Cylinders: 6
- Displacement: 14L
- Bore x Stroke: 140mm x 152mm
- Rotating Speed: 1500r/min
- Cooling System: Forced closed-cycle water cooling with fan
- Lubricating Oil Capacity: 38L

Generator Features

Brushless, AVR Automatic Voltage Regulation, H-Class Insulation, IP22 Protection

Control & Operation

Advanced Control System

The unit is equipped with a self-starting control panel that supports both automatic and manual start functions, with adjustable timing between 15-50 seconds. It includes automatic input and switching capabilities. The display provides real-time monitoring of three-phase voltage, frequency, current, oil pressure, oil temperature, coolant temperature, unit speed, operating hours, and battery voltage. Safety features include alarms and automatic shutdowns for over-speed, low oil pressure, high water temperature, and electrical faults like over-voltage, under-voltage, and frequency deviations.
