Product Overview

High-Efficiency 300L WiFi Heat Pump Water Heater

This advanced 300L air source heat pump water heater is designed for versatile installation in balconies, bathrooms, basements, or gardens. Featuring WiFi connectivity for intelligent control, the unit ensures consistent hot water delivery through multiple heating modes and a 2kW backup heating element. The enamel water tank and micro-channel external coil provide long-term durability and high energy efficiency for residential or commercial applications.

Technical Specifications

Tank Capacity	300 L
Max Water Temperature	75 °C
Refrigerant	R134a
Available Modes	AUTO, ECO, FAST, MULT

Safety & Durability

Anti-Corrosion Features

- Built-in magnesium rod
- Anion anode
- Enamel water tank

Safety Protections

PT valve, Safety Valve, High/Low pressure protection, Electric protection wall, Child Lock

Performance Metrics

System Performance

2 kW

Backup Heating Element

10 meters

Max Ducted Length

Installation & Environment

Ambient Operating Temp

-25°C to 46°C
