

300mAh Rechargeable Ni-Cd Battery 3.6V

This rechargeable Ni-Cd battery has a 300mAh capacity and a voltage of 3.6V. It is designed for cordless devices and provides a reliable, compact power source for various applications.

Product Overview

Reliable Rechargeable Power

This 3.6V Nickel-Cadmium (Ni-Cd) battery is engineered to provide a consistent power supply for cordless electronic devices. With a capacity of 300mAh, it serves as a compact and dependable energy source for various small-scale applications. Its rechargeable nature ensures long-term usability and efficiency for professional and consumer electronics.
