Product Overview

Professional Grade Combination Square

This 300mm combination square is a versatile precision tool designed for woodworking, metalworking, and general construction projects. Featuring a durable stainless steel blade and a robust aluminum alloy base, it ensures reliable accuracy for 90 and 45-degree angle measurements. With an integrated impact-resistant vial and embossed graduations, this tool is built for both durability and ease of use in demanding professional environments.

Technical Specifications

Blade Length	300 mm
Blade Hardness	HRC30 or higher
Material Composition	Stainless Steel Blade, Aluminum Alloy Base

Features

Key Features

- Impact-resistant level vial
- Embossed graduations for durability
- Adjustable head for versatile angle measurement
- Metric and Imperial measurement scales
- Locking mechanism for repetitive tasks

Measurement Capabilities

90-degree angles • 45-degree angles • Depth marking • Height gauging • Leveling
