

304 Stainless Steel Conveyor Belt

This durable belt features a robust construction with interlocking plates, ensuring smooth and reliable material handling. The corrosion-resistant 304 stainless steel provides excellent hygiene and longevity, making it suitable for food processing, pharmaceutical, and other sanitary environments.

Product Overview

Industrial-Grade Conveyor Solution

This 304 stainless steel conveyor belt is engineered for demanding industrial environments where durability and hygiene are paramount. The robust construction featuring interlocking plates ensures reliable material handling, while the corrosion-resistant material makes it ideal for food processing and pharmaceutical sectors. Its modular design facilitates straightforward maintenance, providing a versatile solution for transporting everything from small parts to bulk goods.

Technical Specifications

Belt Dimensions

40 m Total Length	82.6 mm Belt Width	2 mm Wall Thickness
-----------------------------	------------------------------	-------------------------------

Material Grade	304 Stainless Steel
Pitch	38.1 mm

Compliance & Features

Key Features	Corrosion Resistant, Sanitary Design, Interlocking Plates, Modular
---------------------	--
