

304L Stainless Steel Pipe Cap - Weldable, Corrosion-Resistant

This stainless steel pipe cap is designed to seal the end of a pipe. Constructed from 304L stainless steel, it offers good corrosion resistance and is designed for welding onto the pipe.

Product Overview

304L Stainless Steel Pipe Cap

This 304L stainless steel pipe cap is engineered for reliable, permanent sealing of pipe ends in industrial piping systems. Designed for weldable installation, it ensures a secure, leak-proof closure. Its 304L composition offers excellent corrosion resistance, making it suitable for demanding environments where durability is critical.

Technical Specifications

Size Specifications

1.5 inch

Nominal Pipe Size

Material Grade	304L Stainless Steel
Installation Method	Weldable
Visible Markings	83701, 1½, 105, WP 304L
