

30A 4-Pole Contactor for HVAC

This 4-pole contactor is rated for 30A and designed for HVAC and refrigeration applications. It is suitable for air conditioning systems requiring reliable switching of power.

Overview

Reliable Control for HVAC Systems

The SA Series 4-Pole contactor is engineered specifically for demanding HVAC and refrigeration applications. Built for long-term reliability, it offers high-performance switching capability with an electrical lifespan of up to 250,000 cycles under resistance loads. With a universal design suitable for both single and three-phase systems, this contactor ensures consistent control for hermetic compressors and other critical cooling infrastructure.

Technical Specifications

Rated Current	30 A
Pole Configuration	4-Pole
Operating Voltage	24V-480V
Coil Voltage	24V AC
Frequency	50/60 Hz

Durability and Standards

Operating Lifespan

250000 cycles
Resistance Load

100000 cycles
Horsepower Load

1000000 cycles
Mechanical

Certifications

UL, cUL US

Performance Ratings

Horsepower Performance Table

Voltage (VAC)	Horsepower (HP)	LRA (A)
120	2	180
240	5	180
480	10	150
600	20	120
