

30KG Drop Spreader for Granular Materials

This drop spreader has a 30KG/20L capacity long square hopper. Designed for precise distribution of granular materials, its controlled drop mechanism ensures even coverage and minimizes waste.

Product Overview

Professional Drop Spreader

This 30kg drop spreader is designed for the precise and efficient application of granular materials, including ice melt, fertilizers, and seeds. It features a controlled gate adjustment mechanism to ensure consistent coverage while minimizing material waste across various terrains. Built for durability and ease of use, it serves as an essential tool for both residential gardening and commercial agricultural tasks.

Dimensions and Capacity

Body Dimensions	815 x 685 x 815 mm
Hopper Capacity	30 kg

Logistics

Packaging	1pc/CTN
Container Load Capacity (40'HQ)	940 pcs

Application

Primary Uses

- Farming
- Gardening
- Landscaping

Material Compatibility	Salt, Ice Melt, Fertilizer, Seeds
