Product Overview

Precision Laser Leveling for Construction and Installation

This professional-grade cross line laser level utilizes top-tier German Osram green laser technology to provide exceptional visibility, proving twice as bright as standard red lasers. Designed for durability and versatility, the unit features shock-resistant TPR rubber housing and multiple brightness modes to optimize performance in various lighting conditions. Whether for indoor alignment or outdoor construction, this device offers reliable accuracy and long-lasting operation with its rechargeable 1000 mAh Li-ion battery system.

Technical Specifications

Key Performance Indicators

30 m Working Range	3 mm Accuracy at 10m	520 nm Wavelength
------------------------------	--------------------------------	-----------------------------

Safety Class

Class 2

Operational Modes

Brightness Levels

- 50% brightness
- 60% brightness
- 80% brightness
- 100% brightness

Power and Environment

Power Source	1000 mAh Li-ion rechargeable battery
Operating Temperature Range	-10 to 50 °C

Design and Build

Build Quality	Shock-resistant, Wear-resistant, Impact-resistant, TPR soft rubber protection
