

30m Kelly Bar Rotary Drilling Rig

This drilling rig is equipped with a crawler chassis for stability. It is capable of drilling diameters of 500-1600 mm to a maximum depth of 30 meters.

Overview

Integrated Drilling Solution

This integrated rotary drilling rig is designed for deep foundation work, offering a maximum drilling depth of 30 meters. It features a versatile multi-layer telescopic drill pipe system that reduces support time and labor intensity while eliminating the need for sludge discharge. This machine is particularly well-suited for urban infrastructure construction projects requiring efficiency and cost-effectiveness.

Technical Specifications

Drilling Capabilities

- Dry excavation (short augers)
- Wet excavation (rotary drills)
- Hard ground drilling (hammer attachment)
- Bottom hole expansion (specialized tools)

Maximum Drilling Depth	30 m
Drilling Diameter Range	500-1600mm

Certifications & Standards

Compliance & Quality Standards

CE • ISO 9001 • SGS • CNAS
