

30T Hydraulic Cylinder for Confined Spaces

This hydraulic cylinder is designed for applications requiring a compact and powerful lifting solution. With a 30T power rating and 14mm travel distance, it fits in tight spaces where standard cylinders cannot.

Product Overview

Compact Power for Restricted Environments

The RMC-301 is a high-performance, ultra-thin hydraulic cylinder specifically engineered for operations in extremely confined spaces. It features a robust 30-ton capacity and an automatic plunger retraction mechanism for efficient cycle times. With a collapsed height of only 63mm, this tool is an essential asset for industrial maintenance, heavy machinery positioning, and automotive repair tasks where clearance is at a premium.
