Product Overview

High-Efficiency Solar Power

This 30W portable solar charging blanket is engineered for professionals and outdoor enthusiasts who require a reliable, sustainable power source in remote locations. Featuring advanced high-efficiency solar cells encapsulated within durable, weather-resistant fabric, it ensures stable charging for smartphones, tablets, and power banks. Its foldable design allows for compact storage, making it an essential tool for field operations, camping, hiking, and emergency preparedness.

Technical Specifications

Rated Power Output

30 W

Power Output

Output Connectivity

- USB Output Port

Design Features

Foldable, Portable, Weather-Resistant, Integrated Charging Controller, LED Indicators

Usage & Applications

Primary Use Cases

- Camping and Hiking
- Emergency Preparedness
- Field Operations
- Off-grid Charging

Device Compatibility

Smartphones • Tablets • Power Banks • USB-compatible devices
