Product Overview

Sustainable Outdoor Illumination

This 30W solar LED street light system provides a complete, off-grid lighting solution designed for streets, parking lots, and pathways. By utilizing an 18V/80W monocrystalline solar panel and high-capacity battery storage, the unit operates autonomously without the need for external wiring. The system includes a durable 6-meter pole, ensuring optimal light distribution and reliable performance in various outdoor environments.

Technical Specifications

Solar Panel

18 V

Voltage

80 W

Power

Battery Options

- 12V/80Ah Gel Battery
- 12V/30Ah Lithium Battery

LED Power	30 W
Pole Height	6 m
Charge Controller	12V/24V 10A

Certifications & Warranty

Certifications

CE • ROHS • ISO9001

Warranty	3 years
