

315W Ceramic Metal Halide Lamp

This ceramic metal halide lamp produces 600 μ mol/sec PPF and 34000LM. It features a 4200K color temperature and a one-year warranty.

Overview

High-Efficiency Ceramic Metal Halide Lamp

This 315W ceramic metal halide lamp is engineered for demanding horticultural and industrial lighting applications. Featuring a ceramic arc tube, it delivers consistent light output and superior color stability throughout its lifespan. Designed with a universal burning position, this lamp integrates seamlessly into standard 315W CMH ballast systems to support healthy growth and accurate lighting environments.
