

# 3.1L Diesel Engine for Industrial and Power Generation

This robust diesel engine is designed for power generation and industrial applications. Its efficient combustion system and durable construction ensure reliable performance.

## Overview

### Industrial Power Solution

The R3105ZD is a robust 3.1L diesel engine engineered for high-performance industrial applications and power generation. Designed with an efficient combustion system and direct fuel injection, this unit delivers consistent, reliable power output in a compact footprint. It is an ideal solution for integration into heavy-duty equipment such as generators and industrial pumps, prioritizing durability and ease of maintenance.

## Technical Specifications

### Power Output Range

**20 kW**

Minimum Output

**30 kW**

Maximum Output

### Displacement

3.1 L

### Fuel Injection

Direct fuel injection

## Key Features

### Design Advantages

- Compact design for easy integration
- Optimized cooling system
- Engineered for minimal maintenance downtime
- Durable construction for long service life

## Applications

### Suitable Applications

Power Generation, Industrial Pumps, Heavy-duty Equipment
