

32-Ton Luffing Jib Tower Crane

This high-capacity tower crane is designed for heavy lifting in construction and industrial environments. Its luffing jib provides precise load control and maneuverability, while advanced safety features ensure secure and efficient operation.

Product Overview

High-Capacity Luffing Jib Tower Crane

The STL720-32t is a high-capacity tower crane engineered for demanding construction and industrial environments. Featuring a luffing jib mechanism, this crane offers exceptional maneuverability and precise load control, making it ideal for operation in confined spaces. Its robust, modular design ensures reliable performance and facilitates efficient assembly and disassembly on complex job sites.

Performance Metrics

Maximum Lifting Capacity

32 tons

Max Load

Technical Specifications

Crane Type	Luffing Jib Tower Crane
Key Features	Luffing Jib, Modular Design, Variable Jib Angles, Advanced Control Systems

Safety & Operation

Safety Compliance

Advanced Safety Features • Collision Mitigation
