

320-340W Monocrystalline PERC Solar Panel

This high-density monocrystalline PERC solar module is designed for both residential and commercial applications. The all-black frame and cells provide an aesthetic appearance while offering power outputs from 320W to 340W.

Overview

High-Efficiency All-Black Solar Module

This 60-cell monocrystalline PERC module is engineered for both residential and commercial solar installations, offering a power output range of 320W to 340W. The all-black aesthetic design provides a sleek appearance while ensuring high energy conversion efficiency. Built to withstand challenging environmental conditions, this module delivers long-term reliability for both grid-tied and off-grid energy systems.

Technical Specifications

Power Output Range

320 W

Min Power

340 W

Max Power

Design Style

All-Black • High-Density

Cell Technology

Monocrystalline, PERC

Cell Configuration

60 cells

Applications

Suitable Applications

- Residential Installations
- Commercial Rooftops
- Grid-Tied Systems
- Off-Grid Energy Systems
