

# 32000 BTU Air Conditioner with R410A/R22 Compatibility

This air conditioner provides 32000 BTU of cooling and 6000 BTU of heating. It is compatible with R410A and R22 refrigerants.

## Overview

### Professional Climate Control Solution

This high-performance ductless air conditioning unit is engineered for demanding industrial and commercial environments. Featuring robust metallic housing and an efficient ON/OFF control system, it provides reliable cooling and heating performance. Designed for versatility, the unit supports both R410A and R22 refrigerants, ensuring seamless integration into existing facility infrastructures.

## Performance Specifications

### Cooling Capacity

**32000 BTU**  
Cooling

**6000 BTU**  
Heating

### Refrigerant Compatibility

R410A, R22

## Design & Construction

### System Type

Ductless • Industrial Grade

### Control System

ON/OFF

### Housing Material

Metallic
