

32kW Generator Engine R Series

This 32kW generator engine is a robust and reliable power source designed for various power generation applications. It features a durable construction and efficient combustion system, ensuring optimal performance and fuel economy.

Overview

32kW R Series Generator Engine

The 32kW R series generator engine is a robust and reliable power source engineered for demanding power generation applications. Featuring a British Ricardo design, this engine balances high reliability with low fuel consumption to ensure efficient operation. Its durable construction and precision components make it an ideal solution for both prime and standby power needs.

Technical Specifications

Rated Output

32 kW

Power Output

Genset Compatibility	30 kVA
Rated Speed	1500 rpm
Fuel Type	Diesel

Key Features

Engine Highlights

Heavy Duty, British Ricardo Design, High Reliability, Low Fuel Consumption, Easy Maintenance
