

32mm Feeder for SMT Machines

This 32mm feeder is designed for SMT pick-and-place machines. It provides accurate and reliable component feeding for automated PCB assembly.

Product Overview

High-Precision SMT Feeders

This 32mm feeder is engineered for optimal performance with automated placement equipment. Designed to ensure accurate and reliable component delivery, it is a critical component for maintaining efficiency in high-speed electronic assembly processes. The unit is built for durability and consistent output, supporting seamless integration into existing SMT production lines.

Technical Specifications

Feeder Width	32 mm
--------------	-------

Compatibility

Compatible Machine Series	CP Series, SM Series
---------------------------	----------------------

Spare Parts

Compatible Nozzle Models

- CN040
- CN030
- CN065
- CN140
- CN220
- CN750
- CN110
- TN045
- TN065
- TN140
- TN220
- TN400
- TN750
- TN110
