

# 330W Polycrystalline Solar Panel

This 330W polycrystalline solar panel is designed for solar energy systems. It is engineered for optimal energy conversion and durability, making it suitable for residential, commercial, and industrial applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Solar Power Generation

This 330W polycrystalline solar panel is engineered for optimal energy conversion across a wide range of solar energy systems. Designed for both durability and performance, the module ensures reliable power generation in diverse residential, commercial, and industrial environments. Its robust architecture is capable of withstanding challenging conditions, making it an excellent choice for both grid-tied and off-grid solar installations.

## Key Metrics

### Rated Power

**330 W**

Maximum Power Output

## Technical Specifications

|                          |  |
|--------------------------|--|
| System Voltage           | 1500 V   |
| Advanced Module Features | PID Resistant, Weak Light Performance, Harsh Environment Ready |

## Application Suitability

### Recommended Applications

- Residential solar systems
- Commercial energy solutions
- Utility-scale solar farms
- Grid-tied installations
- Off-grid setups
