

# 335W Polycrystalline Solar Panel

This 335W polycrystalline solar panel is designed for solar energy systems. It is engineered for optimal performance and durability, providing a reliable source of renewable energy.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Polycrystalline Solution

This 335W polycrystalline solar panel is engineered for optimal performance and long-term durability in solar energy systems. It features advanced cell technology to ensure maximum energy harvest while maintaining reduced degradation over time. Designed to perform reliably in both weak light conditions and harsh environments, this panel is suitable for a wide range of grid-tied and off-grid installations.

## Performance Metrics

### Rated Power Output

**335 W**

Rated Power

**1500 V**

System Voltage

## Technical Features

### Advanced Capabilities

PID Resistant, Weak Light Performance, Harsh Environment Rated, High Efficiency

## Application

### Suitable Installations

- Residential
- Commercial
- Industrial
- Grid-tied systems
- Off-grid systems
