

337cc 11 HP Air-Cooled Gasoline Engine

This single-cylinder, 4-stroke gasoline engine features a 337cc displacement and delivers 11.0 horsepower. It is commonly used in generators, water pumps, and other small machinery.

Product Overview

Professional Performance Engine

This 337cc single-cylinder, 4-stroke, air-cooled gasoline engine is engineered for versatility and reliability. Featuring an overhead valve (OHV) design, it delivers improved fuel efficiency and consistent power output for demanding professional applications. The robust construction ensures long-lasting operation, making it an ideal choice for generators, water pumps, and diverse machinery needs.

Technical Specifications

Displacement	337 cc
Maximum Power	11 HP
Cooling System	Air-cooled
Engine Configuration	Single-cylinder, 4-stroke, OHV

Features

Starting System	Recoil Starter
-----------------	----------------

Performance Metrics

Power Output

11 HP Horsepower	337 cc Displacement
