

33cc Air-Cooled Gasoline Engine

This gasoline engine is designed for various applications, such as brush cutters and trimmers. It features a compact design, air-cooled system, and durable construction for reliable performance.

Overview

High-Performance Compact Engine

The 1E36F-2A is a versatile air-cooled gasoline engine engineered for reliability and efficient power delivery in small machinery. Featuring a two-stroke cycle design, this unit is optimized for handheld equipment such as brush cutters and trimmers. Its compact, lightweight construction ensures ease of handling while maintaining the durability required for professional-grade applications.

Technical Specifications

Maximum Power

0.9 kW

Power Output

6500 r/min

Rated Speed

Model Number	1E36F-2A
Displacement	32.6 ml
Net Weight	3.4 kg

Design Features

Cooling System

Air-Cooled

Engine Type	Two-stroke
Starting Method	Recoil Starter
