Overview

Reliable Portable Power Solution

The BS4000 is a versatile 3.3kW portable gasoline generator designed for dependable performance in construction, outdoor events, and emergency backup scenarios. Built with a robust open-frame design, it features a high-efficiency OHV engine and an Automatic Voltage Regulator (AVR) to ensure stable power delivery. With a 15-liter fuel tank providing up to 9 hours of continuous operation, this generator is engineered for both durability and ease of use.

Performance Metrics

Power Output

3.3 kW

Maximum Power

14 A

Rated Current

9 h

Engine Details

Engine Specifications

- Type: Single cylinder, four-stroke
- Cooling: Forced air cooling
- Valve Train: OHV
- Displacement: 223cc
- Speed: 3000-3600 rpm

Electrical & Safety

Electrical Interface

Feature	Specification
Rated Voltage	110/220V
Frequency	50/60Hz
Voltage Regulation	AVR (Automatic Voltage Regulator)
Safety Components	Circuit Breaker & Grounding Terminal
Monitoring	Integrated Voltmeter

Physical Construction

Frame Style

Open Frame • Portable

Dimensions	605 x 450 x 470 mm
------------	--------------------

Net Weight	46 kg
------------	-------

Operation

Fuel Tank Capacity	15 L
--------------------	------

Oil Capacity	0.6 L
--------------	-------

Starting Method	Recoil, E-start
-----------------	-----------------

Compliance & Warranty

Certification

Euro-V

Warranty	3 months to 1 year
