Overview

A robust 3.5-ton diesel forklift designed for industrial environments.

High-Efficiency Diesel Forklift

This 3.5-ton diesel forklift is engineered for demanding material handling tasks in warehouses, construction sites, and industrial facilities. It features a reliable, high-performance diesel engine designed for optimal fuel efficiency, reduced noise, and lower vibration levels. With a focus on operator comfort and site safety, this machine incorporates an ergonomic control layout and an enhanced wide-view mast for precise, secure operation.

Key Features

Equipped with an enhanced mast for better visibility and operational safety.

Advantages & Highlights

- One-piece suspension frame design
- Advanced water tank and cooling system
- Ergonomic cabin with optimized steering and controls
- High-efficiency hydraulic system
- Enhanced wide-view mast for improved safety

Technical Specifications

Designed with a compact chassis for maneuverability in confined spaces.

Load Capacity

3.5 Ton

Load Capacity

Model	FD35T
Power Source	Diesel

Certifications

Certifications	CE
