

# 350L Mobile Concrete Mixer

Mobile concrete mixer designed for on-site concrete production with a 350-liter capacity. It features a robust steel frame, rotating mixing drum, and integrated feeding system.

## Overview

### Professional On-Site Mixing Solution

The 350L Mobile Concrete Mixer is engineered for efficient on-site concrete production in small to medium-sized construction projects. Featuring a robust steel frame and a reliable rotating mixing drum, this unit provides the portability and durability required for demanding job sites. Its integrated feeding system streamlines the mixing process, ensuring consistent quality and productivity for your construction needs.

## Technical Specifications

Drum Capacity	350 L
Design Type	Mobile
Key Features	Robust Steel Frame, Rotating Mixing Drum, Integrated Feeding System, Portable Design

## Application

### Suitable Projects

- Small construction projects
- Medium-sized construction projects
- On-site concrete production
