Product Overview

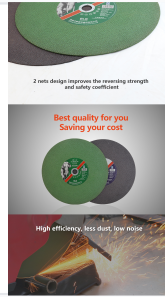

High-Performance Cutting Solution

This 355mm super-thin cutting wheel is engineered for high efficiency and precision in metalworking applications. Featuring a specialized abrasive grain composition and a dual-net design, it delivers exceptional sharpness while maintaining structural integrity and safety. It is an ideal choice for cutting both standard metal and stainless steel materials.

Technical Specifications

Dimensions	355 x 1.8 x 25.4 mm
Maximum RPM	4300
Maximum Operating Speed	80 m/s
Abrasive Specification	WA 36 Q BF

Performance Features

Engineered with a 2-net design for improved reversing strength and safety, ensuring high efficiency and low noise operation.

Key Features

Super Thin • High Sharpness • Dual-Net Design • Low Noise • Reduced Dust

Compatible Materials

Metal, Stainless Steel, INOX

Compliance & Standards

Certifications & Licenses

- ISO 9001
- Production License: XK06-011-00293

Packaging & Logistics

designed specifically for INOX cutting.

Designed specifically for INOX cutting, these wheels are optimized for precision and durability.

Packaging Details

Item	Quantity
Pieces per box	50
Pieces per carton	30-40
