

35A 4-Pole Waterproof Electrical Isolator Switch

This 4-pole electrical isolator switch is rated at 35 Amps and 440V a.c. It features an IP56 waterproof enclosure, providing protection against dust and water ingress.

Product Overview

Industrial Isolator Switch

The 4-pole electrical isolator switch is designed for the safe and reliable disconnection of electrical circuits in demanding environments. Rated at 35 Amps and 440V a.c., this robust unit features an IP56-rated enclosure, providing excellent protection against dust and water ingress. It is an essential component for commercial and industrial electrical installations requiring secure, weather-resistant power isolation.

Installation & Safety

Installation Requirements

- Ensure operating lever and internal switch toggle are aligned in the OFF position during installation
- Proper alignment is required for correct ON-OFF indication
