

3.5mm to 6.35mm Audio Adapter

This adapter converts a 3.5mm (1/8 inch) stereo mini-plug to a 6.35mm (1/4 inch) stereo plug. It is typically used to connect headphones with a smaller plug to devices with a larger jack, such as amplifiers, mixing consoles, and audio interfaces.

Product Overview

Professional Audio Conversion

This 3.5mm to 6.35mm audio adapter is engineered for seamless connectivity between professional audio equipment. Featuring gold-plated connectors, it ensures optimal signal transfer and superior corrosion resistance. It is an essential tool for connecting standard 1/8-inch headphones to 1/4-inch jacks found on amplifiers, mixing consoles, and professional audio interfaces.
