

3.5mm TRRS to 3 RCA Audio/Video Cable

This cable features a 3.5mm (1/8") TRRS connector on one end and three RCA male connectors (red, white, and yellow) on the other end. It is designed for transmitting audio and composite video signals.

Product Overview

Versatile Audio/Video Connectivity

This 3.5mm TRRS to 3 RCA male cable is an essential solution for bridging the gap between portable media devices and traditional home entertainment systems. It facilitates the transmission of both audio and composite video signals, making it ideal for connecting cameras, media players, and other compact devices to TVs, VCRs, or DVD players. Designed for reliability and ease of use, this cable ensures seamless signal transfer for your audiovisual setups.
