

360° Rotatable TV Antenna

This 360° rotatable TV antenna includes a booster, cable, and remote control. It has two output jacks for connecting two TV sets and is weather-resistant for outdoor use.

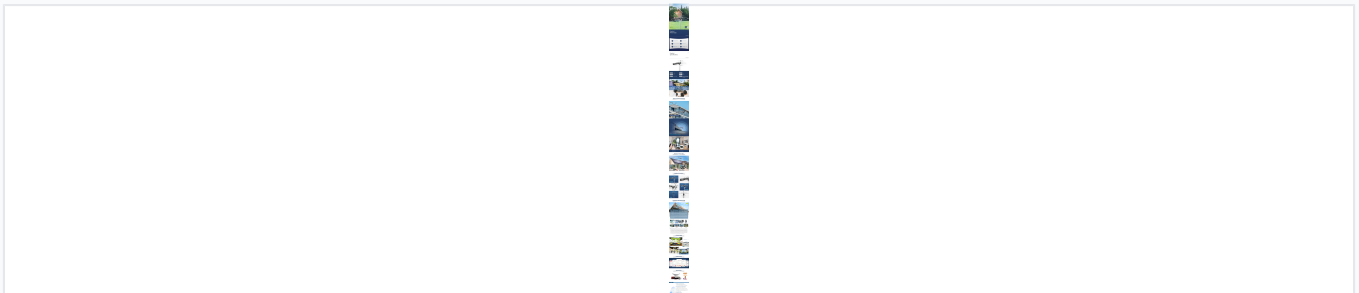

Overview

High-Performance 360° Rotatable Outdoor Antenna

This comprehensive 5-in-1 antenna system is designed to provide superior long-range reception for full HD and digital TV signals. Featuring a 360-degree rotatable base controlled via infrared remote, it allows for precise aiming to capture local VHF and UHF signals with ease. Built with high-quality aluminum and weather-resistant materials, it offers a durable solution for cutting cable costs while maintaining high-quality broadcast access.

Key Features

The antenna features a 360° rotatable design and weather-resistant construction suitable for rooftop installation.

Core Functionalities

- 5-in-1 System: Antenna, Booster, Cable, and Remote Control included
- 360-degree rotation via infrared remote or manual power supply button
- Dual output jacks to support two television sets simultaneously
- Foldable design for easy installation and space-saving packaging
- Integrated reflector panel for high interference resistance
