

360W Monocrystalline Solar Panel

This 72-cell monocrystalline solar panel delivers a maximum power output of 360W. Its 5 busbar (5BB) design enhances current collection and reduces resistive losses.

Product Overview

High-Efficiency 360W Monocrystalline Solar Module

This high-performance solar PV module utilizes advanced monocrystalline silicon cells combined with durable EVA and protective glass to ensure consistent power generation. Featuring 72 cells and 5 busbar (5BB) technology, it is engineered to enhance current collection and minimize resistive losses. Designed for a 20-30 year service life, this panel offers a reliable green energy solution for residential, commercial, and utility-scale installations.

Performance Metrics

Rated Maximum Power

360 W

Max Power Output

Technical Specifications

Environmental Resilience

Low-Light Optimized • High-Temperature Stable • Weather Resistant

Cell Technology

Monocrystalline, 72-Cell, 5 Busbar (5BB)

Operational Lifespan

25 Years
